

Online Spanish Course

For international exchange students

Online Spanish Course

For international exchange students

The objective of this course is that students can practice language that they are going to need from the moment they arrive in Spain, such as essential expressions and vocabulary.

This online course is designed for exchange students who want to gain fluency and improve their comprehension skills in the Spanish language.

This course is ideal for people who enjoy studying in small, dynamic groups and who want to start practising their Spanish as soon as possible. Our teaching method is based on interactive ways to get students speaking quickly in a comfortable and natural setting.

We believe in learning through first-hand experience, which is why our participation-oriented classes focus on empowering students to communicate in real life situations.

Starting date

To be confirmed
